

the requirements of UL 174 or UL 1453 must have their heating elements, temperature regulating controls, and temperature limiting controls tested by the marine inspector at the time of installation.

[CGD 88-057, 55 FR 24238, June 15, 1990, as amended by CGD 95-028, 62 FR 51202, Sept. 30, 1997; USCG-2003-16630, 73FR 65191, Oct. 31, 2008]

§ 63.25-5 Fired thermal fluid heaters.

(a) *Construction.* Fired thermal fluid heaters must meet the requirements of part 52 of this chapter, as applicable.

(b) *Controls.* Fired thermal fluid heaters must have a low fluid level cutout device or a low flow device. When the rate of fluid flow through the heating coils is insufficient to ensure proper heat transfer, the device must cut off the fuel supply to the burner. If the fluid temperature exceeds the designed maximum operating temperature, a high temperature limit device must cut off the fuel supply to the burner. These devices must be of the manual reset type.

§ 63.25-7 Exhaust gas boilers.

(a) *Construction.* An auxiliary exhaust gas boiler must meet the applicable construction requirements of part 52 or part 53 of this chapter as determined from § 54.01-5, Table 54.01-5(A) of this chapter.

(b) *Controls.* Each drum type exhaust gas steam boiler must have a feed water control system. The system must automatically supply the required amount of feed water and maintain it at the proper level. For boilers without a fixed water level, the control system must supply the feed water at a rate sufficient to ensure proper heat transfer. The system must adequately fill the boiler when cold.

(c) *Alarms.* When a condition arises which results in inadequate heat transfer, a high temperature alarm or low flow alarm must be activated. An audible alarm must automatically sound, and a visual indicator must indicate when the fluid temperature exceeds the maximum operating temperature or when the fluid/steam flowing through the heat exchanger is insufficient to ensure proper heat transfer. Additionally, an audible alarm must automati-

cally sound, and a visual indicator must indicate when a soot fire is present in the exhaust gas boiler's uptake.

§ 63.25-9 Incinerators.

(a) *General.* Incinerators installed on or after March 26, 1998, must meet the requirements of IMO MEPC.76(40) (incorporated by reference; see 46 CFR 63.05-1). Incinerators in compliance with ISO 13617 (incorporated by reference; see 46 CFR 63.05-1), are considered to meet IMO MEPC.76(40). Incinerators in compliance with both ASTM F 1323 (incorporated by reference; see 46 CFR 63.05-1) and Annexes A1-A3 of IMO MEPC.76(40) are considered to meet IMO MEPC.76(40). An application for type approval of shipboard incinerators must be sent to the Commanding Officer (MSC), USCG Marine Safety Center, 2100 2nd St., SW., Stop 7102, Washington, DC 20593-7102.

(b) *Testing.* Before type approval is granted, the manufacturer must have tests conducted, or submit evidence that such tests have been conducted by an independent laboratory acceptable to the Commandant (CG-521). The laboratory must:

(1) Have the equipment and facilities for conducting the inspections and tests required by this section;

(2) Have experienced and qualified personnel to conduct the inspections and tests required by this section;

(3) Have documentary proof of the laboratory's qualifications to perform the inspections and tests required by this section; and

(4) Not be owned or controlled by a manufacturer, supplier, or vendor of shipboard incinerators.

(c) *Prohibited substances.* Shipboard incineration of the following substances is prohibited:

(1) Annex I, II, and III cargo residues of IMO MARPOL 73/78 (incorporated by reference; see 46 CFR 63.05-1) and related contaminated packing materials.

(2) Polychlorinated biphenyls (PCBs).

(3) Garbage, as defined in Annex V of IMO MARPOL 73/78, containing more than traces of heavy metals.

(4) Refined petroleum products containing halogen compounds.

(d) *Operating manual.* Each ship with an incinerator subject to this rule

must possess a manufacturer's operating manual, which must specify how to operate the incinerator within the limits described in Annex A1.5 of IMO MEPC.76(40).

(e) *Training.* Each person responsible for operating any incinerator must be trained and be capable of implementing the guidance provided in the manufacturer's operating manual.

(f) *Acceptable methods and standards for testing emissions.* The methods and standards for testing emissions that the laboratory may use in determining emissions-related information described in Annex A1.5 of IMO MEPC.76(40) are:

(1) 40 CFR part 60 Appendix A, Method 1—Sample and velocity traverses for stationary sources;

(2) 40 CFR part 60 Appendix A, Method 3A—Determination of oxygen and carbon dioxide concentrations in emissions from stationary sources (instrumental-analyzer procedure);

(3) 40 CFR part 60 Appendix A, Method 5—Determination of particulate emissions from stationary sources;

(4) 40 CFR part 60 Appendix A, Method 9—Visual determination of the opacity of emissions from stationary sources;

(5) 40 CFR part 60 Appendix A, Method 10—Determination of carbon-monoxide emissions from stationary sources;

(6) ISO 9096 (incorporated by reference; see 46 CFR 63.05–1); and

(7) ISO 10396 (incorporated by reference; see 46 CFR 63.05–1).

[USCG–2003–16630, 73FR 65191, Oct. 31, 2008, as amended by USCG–2009–0702, 74 FR 49229, Sept. 25, 2009]

PART 64—MARINE PORTABLE TANKS AND CARGO HANDLING SYSTEMS

Subpart A—General

Sec.

- 64.1 Purpose.
- 64.2 Incorporation by reference.
- 64.3 Applicability.
- 64.5 Definitions.
- 64.9 Maintenance, repair, and alteration of MPTs.

Subpart B—Standards for an MPT

- 64.11 Design of MPTs.
- 64.13 Allowable stress; tank.
- 64.15 Allowable stress; framework.
- 64.17 Minimum tank thickness.
- 64.19 External pressure.
- 64.21 Material.
- 64.23 Gasket and lining.
- 64.25 Cross section.
- 64.27 Base.
- 64.29 Tank saddles.
- 64.31 Inspection opening.
- 64.33 Pipe connection.
- 64.35 Bottom filling or discharge connection.
- 64.37 Valve and fitting guard.
- 64.39 Valve securing device.
- 64.41 Stop valve closure.
- 64.43 Lifting fittings.
- 64.45 Securing devices.
- 64.47 Type of relief devices.
- 64.49 Labeling openings.
- 64.51 Tank parts marking.
- 64.53 Information plate for MPTs.
- 64.55 Relief device location.

Subpart C—Pressure Relief Devices and Vacuum Relief Devices for MPTs

- 64.57 Acceptance of pressure relief devices.
- 64.59 Spring loaded pressure relief valve.
- 64.61 Rupture disc.
- 64.63 Minimum emergency venting capacity.
- 64.65 Vacuum relief device.
- 64.67 Shutoff valve.
- 64.69 Location of the pressure relief device.
- 64.71 Marking of pressure relief devices.

Subpart D [Reserved]

Subpart E—Periodic Inspections and Tests of MPTs

- 64.77 Inspection and test.
- 64.79 Inspection of pressure and vacuum relief device.
- 64.81 30-month inspection of an MPT.
- 64.83 Hydrostatic test.

Subpart F—Cargo Handling System

- 64.87 Purpose.
- 64.88 Plan approval, construction, and inspection of cargo-handling systems.
- 64.89 Cargo pump unit.
- 64.91 Relief valve for the cargo pump discharge.
- 64.93 Pump controls.
- 64.95 Piping.
- 64.97 Cargo hose.
